

KYMETA®

A Stunning Sea Change

Profoundly Influencing Superyacht Design

The beautiful lines of a well-designed superyacht are a form of art to behold. Yet one thing has continued to destroy truly elegant superyacht design – the domes associated with the satellite systems – until now.

Imagine the possibilities of a truly flat, integrated satellite antenna design that can be embedded in the superstructure of a yacht, eliminating the need for large satellite domes. Flat panels are here and it is time to start planning for your next domeless design.

Kymeta® is leading a new wave of innovation that will change the way superyachts are designed with the imminent launch of a first-of-its-kind flat panel satellite antenna.

Kymeta's mTenna® technology is electronically steered, eliminating mechanical equipment. It is lightweight, flat, thin, and self-acquiring. Plus it scales to support significantly higher internet connection speeds and live entertainment from the same flat panel. Kymeta is already working with the world's leading yacht builders, designers, and management companies.

#NODOMES

The future of superyacht design is flat.

Reimagine your next superyacht design without domes.

Kymeta mTenna technology delivers:

- A flat panel design for a more elegant superyacht design
- An electronically steered antenna with no mechanical parts eliminates passé domes
- An antenna with low power requirements
- A scalable design to support ultra-high bandwidth
- A lighter form factor that provides more flexibility for superyacht designs

SEE IT FOR YOURSELF

Yachts of the Future - Keynote
Day 2, June 29 | 10:00 - 10:45
Main Pavillion

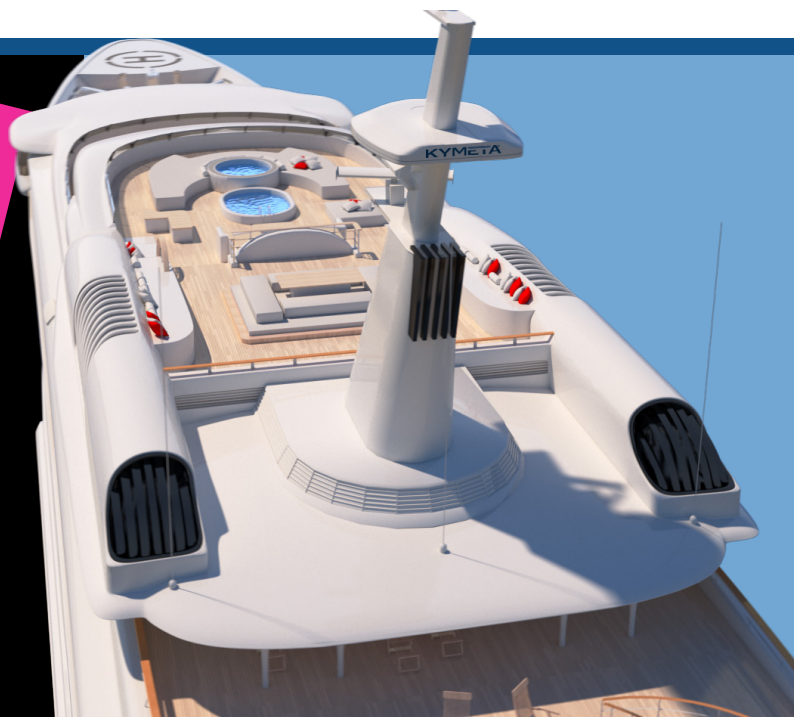

Join designers for a live demonstration of how they will bring extraordinary new designs in superyachts to life.

Domeless Designs Workshop
Day 2, June 29 | 12:00 - 13:30
Summit Furniture, Third Floor, North Dome

Håkan Olsson, VP Maritime, Kymeta

Roger Horner, Global Managing Director, E3 Systems

Ben Julian Toth, Young Designer of the year 2012

Kymeta mTenna technology will be commercially available in 2017
