

KĀLO™

SATCOM / SOTM ACCESS

BY-THE-GB, KU-BAND SATELLITE CONNECTIVITY PLAN

Kymeta's KĀLO™ service redefines connectivity with services purchased in familiar, flexible data packages. Now people and sectors that have long been unreachable, underserved, and ignored by traditional networks have access to simplified global connectivity.

With KĀLO service, easy, flexible satellite connectivity for both fixed and mobile applications eliminates communication barriers with the use of Kymeta mTenna™ technology and KyWay™ terminals. Providing a fully-provisioned end-to-end connectivity solution, KĀLO service unlocks global, mobile access for global government customers that have historically have not had the flexibility, cost advantage and ease of acquisition that KĀLO can provide.

KYMETA™
GOVERNMENT SOLUTIONS

KĀLO™

FEATURES

- Radical access - easy to understand and buy mobile connectivity
- Simple provisioning for quick set up
- Comes bundled with KyWay™ terminals that don't require technicians
- Global coverage area for ubiquitous access
- Familiar data package options provided in by-the-gigabyte plans
- Flexible offerings without complicated contracts
- Scale-up packages to support fluctuating consumption levels

MONTHLY PLANS

Now you can finally buy Satellite connectivity services the way you buy data on your cell phone
